## PALLET WRAPPER & SCALE SYSTEM

## *Takes 150% Overload, Gives 150% Performance*

From its rugged scale base to its sensitive, electronic display, this Pallet Wrapper turntable and Electronic Scale are the practical and proven way to shrink-wrap a shipping skid all at one time. Built to withstand tough, industrial environments. Capacity, up to 40 loads per hour.

Tare's H-190 series Pallet Wrapper and weighing scale system use solid-state technology to assure product performance and accuracy. From the 3/4 HP 8 RPM motor driven turn table to the sensitive 4000 lb capacity scale base the system can be used without caution in areas, which are subject to high traffic.

The convenient on/off floor foot pedal allows the operator complete control over the turntable and two-handed control over the shrink-wrap material. Built in reliability, low maintenance and proven product acceptability make this system unbeatable. Turn-n-Wrap-n-Weigh all at the same time.
