

PORTABLE BEAM SCALE ATTACHMENTS

OVER/UNDER INDICATORS

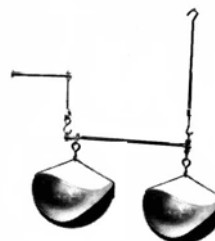

The Mark VII Over/Under indicating head with "Patented" zero balance control is designed for installation on any portable beam scale. Install and forget the balance ball adjustment, no longer will the balance ball require manual adjustments. The Mark VII indicating head can be "zero" adjusted by turning a knob. Place an empty container on the platform, slide the tare poise until the indicator starts to balance, then dial the scale to zero and your scale is ready to use. Solid cast aluminum base, hardened steel pivots and bearings, hydraulic adjustable dashpot, attractive all-steel welded cover provides years of trouble free service. Unit shipped complete with installation instructions, templates, and dash pot oil. Size 9: H x 5-1/8" w x 3-5/8" D. Ship weight 3.75 lbs.

ORDER NO.	DESCRIPTION	PRICE
