WAY BARS

These TARE Portable Way Bars are built to withstand even the harshest environments. Built of thickwall tube steel, they will give you 150% performance when weighing. Two bars per set, with standard shear beam load cells. They have built-in horizontal checking to assure accurate weightments. The bars are equipped with 8' of cable. These way bars convert existing systems such as tanks, hoppers, or conveyors into accurate scales. Can also be converted to a floor scale by placing 3 or 4 tubes between them to weigh skids or drums. Complete with TI-500E Digital Indicator and pre-calibrated for easy set up. Power Requirements: 110 VAC. Shipping Weight shown below. Warranty 1 year.

MONORAIL SCALES

These fully electronic Monorail Scales are designed to provide operational reliability and weighing accuracy in a wide variety of industrial scale applications. Both the medium and heavy capacity units are easy to install and are shipped complete with either 3" x 1/2" or 6" I-Beam load rail. All scales are engineered to minimize the space required above and around the track and rail. Two load cells with a self-checking system eliminate the need for check rods. All scales are equipped with load cells, Stainless Steel junction box, Stainless Steel or epoxy painted metal surfaces and the TARE 7400 Stainless Steel digital indicator. Custom sizes available, consult factory. Shipping weights vary depending upon capacity ordered from 25 lbs to 120 lbs. Warranty 1 year.
